

Hello, my name is Shahdin Farsai and I am focusing on the improvement of policy and services/programs for FASD children and youth as the subject for my thesis in my Masters in Public Policy program.

My main methodology is to speak with caregivers/parents of children and youth to understand what their experiences have been thus far. While I prefer speaking with caregivers/parents of children/youth of Aboriginal descent, I am still open to speaking with other caregivers/parents. There is a modest honorarium of \$20 involved for an interview that should not last more than 1 hour.

If you are interested please read the consent form for further details and contact me.

Thank you for your support.

Sincerely,
Shahdin
